FINGERPRO ID REMOTE WORKSTATION INSTALLATION CHECKLIST

FingerPro ID Remote Workstation for Mississippi healthcare facilities comes in two configurations. ***Livescan Device Configuration*** includes a certified livescan device for capturing fingerprints using inkless technology. ***Desktop Scanner Configuration*** utilizes a desktop scanner for capturing the fingerprint images from inked cards.

The installation checklist is the same for both configurations.

Before the FingerPro ID Remote WS can be installed in your facility please check if your facility meets the following requirements.

Recommended computer specifications

- RAM: 4GB or higher
- OS: Windows XP or higher

Mandatory items that must be ready at the installation time

- Computer user name and password (with administrator rights). Required only for the installation.
- Printer connected to the computer and printer's driver installed on the computer. The printer can be a network printer.
- Space to put the scanner with a short cord which will be connected to the USB port of the computer.
- Adequate electrical power available for the computer, printer, scanner, and any peripheral devices you may have. Please bear in mind that the scanner cable which is about 5 feet in length must be attached usually to the rear of your computer, and likewise, there must be accommodation for the electrical cord connected to the scanner.
- Monitor configuration for the screen size of 1024x768 pixels or larger.
- Connection to fast Internet.
- Computer port USB 2.0

Optional items

There are three different ways for electronic submissions from FingerPro ID Remote WS. To utilize the recommended transmission mode via e-mail the items listed below are required.

- The name or IP address of your Mail Server.

- Any qualified e-mail user account name and password
- Any valid e-mail address at your Mail Server

Fingerprint capturing hardware

- In the *Desktop Scanner Configuration* you can purchase and install the EPSON Perfection 4490 PHOTO (requires USB 2.0 port) which has been FBI-certified with the FingerPro ID software.

Multiple facilities

One remote workstation can submit records on behalf of many facilities. If there is more than one facility submitting records from your workstation please specify all Facility ID Codes and indicate which one will be the default Facility. It is very important to provide the exact Facility ID Codes since each record submission will charge the submitting facility identified by the Facility ID Code.
